

Connect X

Premium Real-Time Chat Application (UI/UX Design)

Overview

Connect X is a premium messaging application concept designed in Figma, focusing on creating a modern, clean, and intuitive communication experience. The design emphasizes usability, accessibility, and a visually engaging dark interface.

Problem

Many messaging applications become visually cluttered and difficult to navigate, reducing the overall user experience.

Solution

Designed a streamlined chat experience with organized conversations, modern messaging screens, intuitive navigation, responsive layouts, and a premium dark theme that improves readability and usability.

My Role

- UX Research
- User Flow Design
- Wireframing
- High-Fidelity UI Design
- Prototyping

Tools

Figma

Outcome

Created a polished mobile UI prototype that demonstrates modern interface design principles, consistent design systems, and user-centered interaction design.
