

Threat Watch

AI-Powered Cybersecurity Dashboard

Overview

Threat Watch is an intelligent cybersecurity monitoring platform that visualizes network threats, suspicious activities, and security analytics through an interactive dashboard powered by machine learning.

Problem

Security analysts require a centralized interface to monitor threats, analyze attacks, and quickly identify suspicious behavior without navigating multiple tools.

Solution

Created a professional dashboard featuring live analytics, threat detection panels, risk scoring, activity monitoring, and AI-generated insights with a modern dark interface.

My Role

- UI/UX Design
- Frontend Development
- Dashboard Design
- Machine Learning Integration

Technologies

HTML • CSS • Bootstrap • JavaScript • Python • Flask • FastAPI • Machine Learning

Outcome

Developed a scalable security dashboard capable of presenting complex cybersecurity data in an accessible and visually engaging manner.
