

Tubbz

Digital Sticker Marketplace (UI/UX Design)

Overview

Tubbz is a creative mobile marketplace concept designed in Figma, allowing users to discover, collect, and purchase premium digital sticker packs through a fun yet modern shopping experience.

Problem

Digital sticker platforms often lack engaging interfaces and organized browsing experiences, making it difficult for users to discover new collections.

Solution

Designed an intuitive marketplace with featured collections, trending stickers, category browsing, search functionality, product previews, favorites, and an easy purchasing flow.

My Role

- UX Research
- User Flow Design
- Wireframing
- High-Fidelity UI Design
- Interactive Prototyping

Tools

Figma

Outcome

Produced a visually engaging mobile marketplace prototype that showcases strong visual hierarchy, consistent branding, and user-focused design.
